

Lantmännens Energi AB signs agreement to acquire Ekobenz

Lantmännens Energi AB has entered into an agreement with ARP (Agencja Rozwoju Przemysłu) S.A. and the minority shareholders to acquire Ekobenz in Poland. The acquisition extending and strengthening Lantmännens Energy's position as a leader in bioenergy products by building a fully integrated and resilient supply chain for sustainable fuels. It reduces reliance on fossil resources and delivers scalable, commercially viable solutions for sectors where electrification is not yet feasible.

Founded in 2006 by Stanisław Jabłoński in Lublin, Poland, Ekobenz has pioneered Ethanol-to-Gasoline (EtG) technology, producing advanced biofuels that significantly reduce CO₂ emissions. In 2017, the company started operating a state-of-the-art commercial facility in Bogumiłów and a track record of producing millions of litres of sustainable fuel. Ekobenz employs 61 people, creating sales revenue of €13m (2024) and has a strong customer base in the special fuels segment (particularly within motorsport).

“With the acquisition of Ekobenz we extend our value chain and strengthen our position as a leader in sustainable fuels. By combining proven technology with Lantmännens's biofuel expertise, we take another step toward sustainable and scalable biofuel solutions.” says Magnus Kagevik, Lantmännens's CEO and Group President.

Ekobenz will be able to leverage the technical expertise of Lantmännens Biorefineries which has a wealth of experience in producing Ethanol with worldclass sustainability, offering an impressive reduction of up to 98% of CO₂ emissions compared to fossil gasoline, at its Norrköping facility. This will support a reliable, sustainable feedstock foundation for the production of Ekobenz's bio-gasoline, alongside existing supply chains.

With a production facility already operational and certified in Europe, Ekobenz brings to Lantmännens Energy a long-proven technology to produce high-quality sustainable fuels. This includes bio-gasoline, bio-LPG, and bio-aromatics. The integration of Ekobenz into Lantmännens's energy portfolio enhances it's capacity to offer immediate, scalable, and infrastructure-compatible solutions to reduce greenhouse gas emissions.

“With Ekobenz, we gain valuable expertise and the capacity to produce bio-gasoline based on bio-ethanol. Combined with our existing operations, this acquisition enables us to close the value chain for sustainable fuels - from raw material to finished product”, says Niklas Lindberg, Senior Vice President Lantmännens Energy Division

The transaction is expected to be completed by 1st December 2025.

About Lantmännen Energy

Lantmännen Energy Division is one of Sweden's largest producers of bioenergy products, accounting for 10 percent of the Group's sales. The division manufactures and markets sustainable ethanol fuel, protein feed, carbon dioxide, starch products, gluten, vodka, beta-glucan, oat protein, alkylate petrol, lubricants, and other chemical products. The division operates in a global market with the focus in Europe. The Energy Division includes Lantmännen Biorefineries, Lantmännen Aspen and Lantmännen Biogas AB with facilities in Sweden, France, England, Finland, and Denmark. The division has wholly or partly owned companies in the Nordic region, France, Germany, the UK, and the USA.

About Lantmännen

About Lantmännen: Lantmännen is an agricultural cooperative and Northern Europe's leader in agriculture, machinery, bioenergy and food products. Owned by 17,000 Swedish farmers, Lantmännen has 12,000 employees, operations in over 20 countries and an annual turnover of SEK 70 billion. With grain at the heart of the operations, Lantmännen refine arable land resources to make farming thrive. Some of Lantmännen's best-known food brands are AXA, Kungsörnen, Scan, GoGreen, FINN CRISP, Schulstad and Vaasan. The company is founded on the knowledge and values acquired through generations of farmers. By engaging in research, development and operations throughout the value chain, Lantmännen takes responsibility from field to fork. For more information: www.lantmannen.com
